

Network Monitoring by TeamViewer

Add visibility to your network. Ensure a stable environment. Reduce downtime.

TeamViewer Monitoring

How many devices are connected to your networks? Do your printers have enough toner? Can you sustain a power outage?

Reduce undesired downtime and provide an interruption-free and stable work environment that sets your company and clients on a path of high productivity and success.

Our printer is low on toner!

How to make sure your clients don't grow anymore frustrated at their printers?

How many devices are there?

You are expected to manage and support all devices, but are you sure you got them all?

Are we prepared for a power outage?

Are your backup batteries healthy? Can they sustain a power outage?

Automatic Device Detection

Scan your network automatically for all connected devices and receive a comprehensive device list.

Track Availability and Fault

Know when a device becomes unavailable, or requires your attention.

Increase Uptime and Productivity

Fix problems before they become serious, and ensure business continuity.

Reduce undesired downtime

Routers & Switches

Be notified as soon as a state of a port changes to open, broken, or disabled.

Network Printers

Receive a notification as soon as the paper or the toner needs to be refilled.

Network Attached Storage (NAS)

You will receive an alert as soon as the available storage reaches a set threshold, or your disk health declines.

Computers

TeamViewer Monitoring checks various crucial aspects of your computers as the CPU usage, the disk space, and much more.

Uninterruptible Power Supplies (UPS)

As soon as the UPS reaches a set minimum battery level, an alert will be triggered.

Take Your IT Service Management to the Next Level.
