

Patch Management by TeamViewer

Automatic Software Vulnerability Detection and Patching

Only one unpatched device puts your entire IT at risk.

Patch Management by TeamViewer is your integrated solution to **detect and patch vulnerable, outdated software**. Keep your IT infrastructure up-to-date and safe by automatically evaluating and applying **Windows OS and 3rd party application patches**.

Windows Updates

Keep your Windows devices up-to-date by managing and deploying Windows updates from a central locations.

3rd Party Applications

Don't put your IT at risk by only focusing on OS updates. Monitor and deploy patches for 3rd party applications automatically.

Custom Policies

Define individual policies to accommodate the varying needs of your end-users, entire departments, or different customers.

Automation

Automate your patching process! Automatically detect and patch software and OS vulnerabilities.

Patch Management is part of
TeamViewer Monitoring & Asset Management

Supported 3rd Party Applications
Scan or click the QR code to see the hundreds of supported 3rd party applications.

Comprehensive & Intuitive

Patching doesn't have to be complicated

With Patch Management by TeamViewer, you will not spend hours familiarizing yourself and your staff with an un-intuitive solution.

Benefit from a solution that is easy-to-use, yet comprehensive and agile.

Quickly see the update statuses of your devices, and all available patches from one convenient location.
